CHOCOLATE

ITEM NUMBER | DESCRIPTION (BRAND) | MINIMUM % CACAO | PACK SIZE

A NOTE ON MINIMUM COCOA/CACAO %

Minimum cocoa/cacao percentage references the amount of cocoa mass in the chocolate, i.e. 70% is 70% cocoa, 30% other ingredients such as sugar, other flavors, lecithin, etc. You can use the percentage as a general indicator of chocolate flavor intensity versus sweetness -- the higher the percentage, the more intense, and less sweet the chocolate. However, even if two different chocolates have the same percentage, they can vary noticeably in sweetness, flavor & intensity due to cocoa bean varieties and cocoa butter content which affect sweetness and intensity. Inquire with your rep for samples to find the right chocolate for you!
